UNIVERSAL WIRE BOOK SUPPORT

This patent-pending product eliminates the need to buy different wire book supports for use on different size library shelves. The Universal Library Wire Book Support easily expands and contracts to fit any manufacturer's shelf from 7" to 12" deep. You can install it with either the 6" end down for smaller books or with the 9" end down for larger books. To slide the Universal Library Wire Book Support into any position simply squeeze any two coils and release in position desired. Finish is Bright Galvanized to resist rust and corrosion for many years.

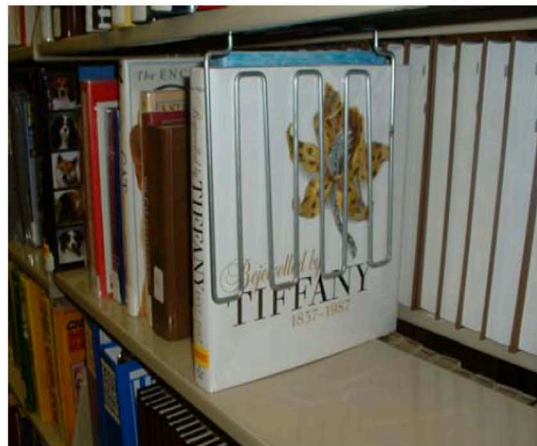

Universal Library Wire Book Support
(Shown with 6" side flat on the table
and the 9" side extending upward.)

(Shown with 6 inch side retaining books)

(Shown used as Book Ends)

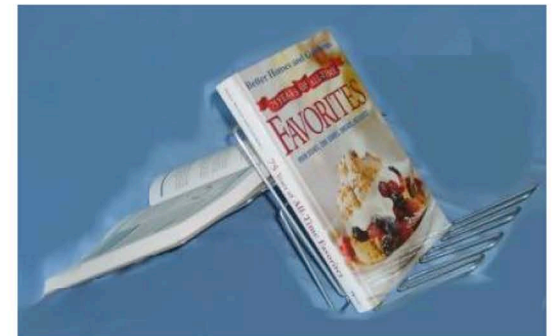

(Shown with 9 inch side retaining books)

Economical Design

Since it is a one size fits all design, which employs the latest CNC, computer controlled technology, the manufacturer can make long production runs without stocking many different sizes. This also reduces costly material handling, stock picking and stock mixing mistakes. The wire is shipped to the factory pre-galvanized so a secondary finishing operation is not necessary. The product is nests efficiently and is packed right from the production machine.

Strong enough to hold heavy art books.

(Shown as Open & Closed Book Display)
